

Fatih Kartal

Senior Mobile & Full-Stack Developer | React Native · TypeScript · Flutter · Kotlin · Next.js · NestJS · PostgreSQL · Supabase

Izmir, Türkiye · fthkrtl.35@gmail.com · +90 545 935 88 08 · linkedin.com/in/fthkrtl · github.com/fatihkartal35 · bionluk.com/fatihkartal35

Open to remote full-time roles and freelance engagements

SUMMARY

Mobile and full-stack developer with 15 years of experience shipping consumer and B2B apps end to end. Built and published 20+ iOS and Android apps with React Native, Flutter and native Kotlin, reaching 250K+ downloads. Owns the full lifecycle: product scoping, UI, backend (NestJS, Laravel, Supabase, PostgreSQL), in-app subscriptions, release automation and store compliance. Delivered 150+ client projects on Bionluk, Turkey's largest freelance marketplace, with a 5.00/5.00 rating.

SELECTED PUBLISHED APPS

- Simple Settings** · Android, Kotlin, AdMob · Google Play
Gathers 70+ Android system settings pages into one searchable screen with favorites, shortcuts and a Quick Settings tile. Live since 2019; v2.0 rewritten in 2026 with Material You and 17 languages. 200K+ downloads, 4.3 rating (539 reviews).
- SPL Prep** · React Native, Supabase, RevenueCat, Sign in with Apple/Google · App Store · Google Play
Exam prep for Turkey's SPK capital markets licensing: lessons, timed practice tests, progress tracking. Built the subscription funnel with RevenueCat (monthly and yearly plans, free trial). 10K+ downloads.
- Kırmızı İSG** · React Native, Supabase, RevenueCat, OpenAI API · App Store · Google Play
Platform for occupational health and safety specialists: regulation announcements, AI-assisted report generation, job listings. Designed the AI report pipeline (prompt templates, structured output, PDF export). 5K+ downloads.
- HizmeteGel** · React Native, Supabase · App Store · Google Play
Two-sided marketplace for home and workplace services with a request-and-quote flow and provider matching. 5K+ downloads.
- Kimdeo** · React Native, PocketBase · App Store · Google Play
Classifieds marketplace with category and brand filters, seller following, push notifications and seller ratings. Built the listing search and moderation flow on a self-managed PocketBase backend.
- Granülcü** · React Native, self-hosted Supabase · App Store · Google Play
B2B trading platform for recycled plastic granules with filtering and in-app messaging. Set up and operated a self-hosted Supabase instance (Docker, backups, SSL) for the client.
- Also live on both stores: SoloMate, MuscLens, ProKids, Angebotszone24, ZekaKasa, Diş Hekimleri Grubu, Monetly, Yönetsen, WakeApp. Full list with links: bionluk.com/fatihkartal35.

EXPERIENCE

- Freelance Mobile & Full-Stack Developer · Self-employed, Izmir (remote)** Aug 2016 – Present
- Designed, built and published 20+ iOS and Android apps with React Native (Expo), Flutter and native Kotlin, owning the full cycle from product scoping and UI to App Store and Google Play release and post-launch maintenance.
 - Implemented subscription monetization with RevenueCat (trials, paywalls, restore flows) and ad monetization with AdMob.
 - Built REST APIs with NestJS, Laravel and Node.js on PostgreSQL and MySQL, and backends on Supabase (hosted and self-hosted), PocketBase and Firebase.
 - Automated builds and store submissions with EAS Build and Submit; shipped over-the-air updates with EAS Update.
 - Integrated push notifications (FCM, APNs), Sign in with Apple and Google Sign-In, deep links and in-app messaging.
 - Built admin panels and web apps with Next.js and Vue.js, including zekasa.com.tr and sehrinmenu.com.
 - Handled App Store review rejections, privacy manifests, data-safety forms and policy updates across 20+ apps continuously live since 2019.
 - Delivered 150+ client projects on Bionluk with a 5.00/5.00 rating, turning written requirements into shipped products on fixed scope and deadline.
- Web Developer · Uşak University** Sep 2010 – Mar 2012
- Built and maintained university web pages and internal tools with PHP, HTML and CSS while completing the Mathematics degree.
